

Image 1
November 27, 2008
7:00 p.m.

The Pleiades, aka the Seven Sisters, over the eastern horizon.

Image 2
December 1, 2008
6:00 p.m.

Jupiter, Venus, and a waxing crescent moon over the south-southwest horizon.

Image 3
December 6th, 2008
1:00 a.m.

Saturn low over the eastern horizon.

Image 4
November 11, 2008

Sunspot 1008. This image is purple because the picture was taken through a violet Calcium-k filter, which reveals bright magnetic froth around the sunspot!

Image 5
November 18, 2008

The blank sun.

Image 6
November 24, 2008

Ejecta from a Coronal Mass Ejection (CME) billows out from the sun.

Night sky images were created with Starry Nights software and are used with permission. Solar images are courtesy of the Solar and Heliospheric Observatory (SOHO).
