

The Adler Planetarium Brings Science To You With 'Scopes in the City!

CHICAGO – April 19, 2016 – All year long, Adler astronomers and educators are bringing the museum—and the Universe—a little closer to you! With 'Scopes in the City, Adler team members lead free sky-observing programs and related conversations in Chicago and Chicagoland neighborhoods. Depending on the dates, times and locations of the 'Scopes in the City events, attendees may be able to observe the Sun, Moon, Jupiter, Saturn, and more. In 2015, nearly 2,200 people attended 'Scopes in the City events!

Below are the dates for the 2016 events. Please visit our website at http://www.adlerplanetarium.org/education/scopes-in-the-city for more information, and additional events as they are added.

About the Adler Planetarium:

The Adler Planetarium—America's First Planetarium—is more than a museum; it is a laboratory, a classroom, and a community exploring the Universe together. Each year, over 550,000 visitors experience the museum's interactive exhibitions, live planetarium shows, hands-on, minds-on STEM education programs, and world-class collections. Founded in 1930 by Chicago business leader Max Adler, the Adler Planetarium is a recognized leader in public engagement. The museum's scientists, historians, and educators inspire the next generation of explorers and invite you to explore space with us.
