Want a birthday that’s
OUT OF THIS
WORLD?

BEST BIRTHDAY EVER!
HOST YOUR NEXT PARTY AT THE ADLER PLANETARIUM

Assemble your mission crew and launch an out-of-this-world birthday adventure at the Adler Planetarium! You and your guests will enjoy full access to Planet Explorers, the ultimate planetary play space, where you can take the helm on a modern day space adventure. Future astronauts can climb aboard a two-story rocket and experience a simulated blast-off into outer space.

The fun continues with an immersive sky show and hands-on science activities led by your own personal Flight Commander!

PARTY PLAN OPTIONS

FLIGHT PLAN 1

$700 for up to 25 guests (any combination of adults and children including the birthday family), $20 for each additional guest. Includes:

- Museum entry & choice of one show
- Special birthday message at the beginning of the show
- Up to 3 hours use of party room
- On site party host to assist with facilitating the party

FLIGHT PLAN 2

$900 for up to 25 guests (any combination of adults and children including the birthday family), $25 for each additional guest. Includes:

- Everything from Flight Plan 1
- One parking space for the birthday party family
- Hands-on science activity hosted by an Adler Facilitator
- Up to 4 hours use of the party room
IMAGINE THE MOON

Have you ever really looked at the Moon? To some, our Moon may seem cold and remote. To others, it’s predictability brings comfort. Our celestial partner has been a source of wonder for all of human history. It has been a muse for poetry, art, and epic stories. As people studied and recorded the patterns of the Moon’s movements, they discovered that the Moon was much more than a mysterious light in our sky—it was a place they might be able to visit some day.

PLANET NINE

Follow “Pluto Killer” Mike Brown and his team at CalTech as they uncover dwarf worlds like the remarkably bright Eris; Haumea, an egg-shaped object rotating incredibly fast; and Sedna, whose orbit takes it deep into the far reaches of the Solar System. Is there a new planet beyond these distant objects? You’ll tag along on Mike Brown’s first night searching for the ninth planet at the Subaru Telescope in Hawaii. Join us on the hunt as we search for a planet that may be hiding in plain sight.

DESTINATION SOLAR SYSTEM

The year is 2096. Space tourism is booming, and you’ve signed up for a quick trip around the Solar System with Space Express Tours! In this live show, your guides are Jesse, a lovable rookie tour guide who can’t wait to show you the wonders of your celestial neighborhood, and Max, the much more experienced—if slightly grumpy—shipboard computer. With Max steering the ship and Jesse chattering excitedly about each place you visit, you’ll soar through the Asteroid Belt, explore the moons of Jupiter and Saturn, and hover over the roiling surface of the Sun. Hold on tight!

SKYWATCH LIVE!

The Adler’s view of downtown Chicago is magnificent, but the lights of the city make it a little tough to see the ones in the sky. What’s a stargazer to do? Join us for Skywatch Live! In this show, your live presenter will turn down the city lights and crank up the stars to show you the night sky over Chicago like you’ve never seen it before. You’ll learn how to navigate by starlight, get to know the stars behind your favorite constellations, and witness the incomprehensible vastness of the Universe without ever leaving your seat.

ONE WORLD ONE SKY: BIG BIRD’S ADVENTURE

This is an animated adventure geared towards young children. Young audiences will be thrilled to find themselves on Sesame Street with Big Bird and Elmo! The fun begins when Elmo’s friend, Hu Hu Zhu, visits from China and the three stargazing friends embark on an exciting journey of discovery to learn about the Sun, the Big Dipper, and more. Elmo and Hu Hu Zhu blast off on an imaginary trip to the Moon and after they return home to Earth, everyone discovers that, no matter where we live, we all share the same sky.

TOO MUCH FUN!
LETS DO SCIENCE ACTIVITIES

ROARING ROCKETS (All Ages)
NASA’s new Orion spacecraft reached speeds of up to 20,000 miles per hour!
How fast will your rocket go? Make your rocket, launch and watch them soar! In this activity, groups can work individually or in engineering teams to design, build, and refine a high-flying rocket. How far will your rocket fly? Can it spin on the way there? The sky’s the limit with this rocketing challenge.

BLOWN AWAY (All Ages)
Neptune has some of the strongest winds in our Solar System, including breezes of 1,340 miles per hour. Can your spacecraft survive this windy flight? Create a flying machine and test it in our wind tunnel! Try out a model that will hover within the tunnel or one that can shoot out and land safely. What happens if you add cargo—or an astronaut—that needs to be protected? Building, testing, and adapting your design will take your spacecraft to new heights.

READY TO LAUNCH?
The party schedule, including start and end times, depend on Adler availability and selected sky show.
The parking lot adjacent to the Adler Planetarium is usually $25.00, but please note that the Adler does not own the parking lot, and the rates are subject to change.
All birthday adventures must end by 3:30 pm, but guests are welcome to stay and explore the exhibitions until the museum closes.
We will need an accurate count 10 days before your party date to reserve the seats in the theater and arrange for supplies for the activities.

You are welcome to bring your own cake. All other catering needs to be coordinated through our exclusive in-house caterer, Food For Thought. To arrange catering, please contact Lupe Solis at lsoles@fftchicago.com.
Free-standing decorations only, please. Unfortunately, we don’t allow balloons, confetti or glitter.
Have questions? Or want more information? Please contact birthdays@adlerplanetarium.org.

SEE YOU SOON!
## SUPER NOVA SNACKS

(10.50% tax and 18% set up and delivery fee will be added to per person prices)

<table>
