Welcome to *Celestial Bash!*

Tonight, the entire museum is yours, below is a sampling of the experiences that await. Let your cosmic journey begin.

HAVE A STELLAR EVENING!

Chasing Eclipses

Lower Level

Our newest exhibition will help you find inspiration from those who have seen and studied solar eclipses in the past and those in the present who have been in the shadow of the Moon during an eclipse. Get prepped for upcoming solar eclipses on October 14, 2023, and April 8, 2024.

Stargazers Hub

Lower Level

Offers a multisensory journey through time with a focus on historic objects. Examine rare astronomical tools and see some of the oldest known telescopes in existence. Snap a selfie at the wall of mirrors or find your footing on the Planetarium's original compass rose.

Chicago's Night Sky

Lower Level

Get a first-hand look at the work Adler teens and experts are doing to measure light pollution in Chicago and help find solutions to restore and protect dark skies. And pop into our *Star Studio*, a space to reflect, imagine, and express yourself through art.

The Atwood Sphere

Chicago's Night Sky | Lower Level

Enjoy a small-group, guided tour of Chicago's night sky in Chicago's oldest planetarium with Adler's VP of Science Engagement, Dr. Laura Trouille.

Astronomy Conversations

Space Visualization Lab | Lower Level

Ask astronomers Dr. Geza Gyuk and Dr. Mike Zevin everything you've ever wanted to know about black holes, aliens, the JWST, and space topics from here to the end of the universe.

Captivating Sky Shows

Space Theater | Lower Level

Sit back and take in one of our immersive dome shows detailed below. Adler Planetarium President & CEO, Dr. Michelle Larson, will provide remarks ahead of each screening.

Skywatch Live!

***Space Theater | 7:30 pm & 8:30 pm
(approx. run time 35 minutes)***

In this live-narrated, simulated stargazing experience, guests will learn about what planets and constellations can be found in the autumn night sky over Chicago (if light pollution didn't exist!).

Pink Floyd The Dark Side Of The Moon

***Space Theater | 9:30 pm
(approx. run time 45 minutes)***

Celebrate the 50th anniversary of one of the best selling albums of all time with an immersive space and musical experience like you've never seen before.

Telescope Observing

***Doane Observatory | 8:00 pm–10:30 pm
(weather permitting)***

(outside, behind the Adler. The Doane is accessible through the Main Entrance, Accessible Entrance, and from the Lower Level at the back of Chicago's Night Sky)

The Adler is home to the largest telescope available to the public in the Chicagoland area! That means tonight, our guests get to see the sharpest and brightest views of our universe that Chicago has to offer.

DJ, Space Visualizations & Dancing

Grainger Sky Theater

***7:00 pm–9:00 pm Space Visualizations
9:00 pm–10:30 pm Dance Party!***

Our space visualizations are a fusion of art, science, and imagination—an invitation to explore the mysteries of the universe through a symphony of light and motion paired with a live DJ.
