

HOW TO BECOME AN ASTRONAUT

You do not have to be a superhero to _____ to space! Anyone can become an astronaut, but they have to put in some _____ work first. It takes _____ years of study before you begin your training and you have to attend a university to study _____, _____, or one of the sciences. Many astronauts also learn to be _____ in their country's air force. It's also important for astronauts-in-training to be healthy—training and space flights can be very _____! You also have to be comfortable in small spaces. On a spacecraft, astronauts live and work in a very small space and need to learn how to be comfortable close to other _____. Do you have what it takes to become an astronaut?
